Education

Medicaps University, Indore B.Tech in Computer Science Engineering	2022 – 2026 CGPA: 8.15
St.Peter's High School, Jaora XII	(CBSE) 84.40% (2022)
St.Peter's High School, Jaora X	(CBSE) 81.40% (2020)

Skills

Core Technologies and Tools: Python, Docker, Git, Postman, Render.

Backend Development: Flask, FastAPI, MySQL, Postgress.

Artificial Intelligence: Machine Learning, Deep Learning, Vector Embedding, Model Deployment.

Data Engineering: ELT/ETL Pipelines, Data Modeling, Data Warehousing.

Certification

Data Analyst Trainee — HCL Tech

- **Developed practical data analysis** and reporting skills through hands-on enterprise projects under corporate mentorship.

AI/ML Trainee— Smart ED Innovation

- Completed comprehensive training in Python, Machine Learning, and Neural Networks to build, train, and deploy intelligent AI models.

Projects

Customer Churn Prediction Model | Machine Learning, Python

- Developed a Customer Churn Prediction model using Python and the Random Forest algorithm, achieving high predictive accuracy through effective data preprocessing and model optimization.
- Performed Exploratory Data Analysis (EDA) and Feature Engineering to identify key factors influencing customer churn and improve model performance.
- Evaluated the model using Precision, Recall, F1-Score, and ROC-AUC, delivering actionable insights to support customer retention strategies.

End-to-End Data Engineering Pipeline using Databricks | Databricks, PySpark, SQL

- Developed an end-to-end Data Engineering pipeline in Databricks using PySpark and SQL, implementing Bronze, Silver and Gold layers for data ingestion, transformation, and processing.
- Built scalable ETL pipelines to clean, validate, and transform FMCG sales data, optimizing Spark jobs and SQL queries for efficient data processing.
- Designed interactive business dashboards to visualize sales, revenue, customer, and product insights, enabling data-driven decision-making.

Key Strengths

-
- Strong problem-solving and debugging skills.
 - Expertise in SQL and Python.
 - Data Visualization Skills and Efficient Data Workflows.
 - Quick Adaptability to tools and Platforms.
